Hey Google

Operating Ativo Automation App
1. Open the app and sign up with a new account.
2. Once the account is created ask the Ativo Automation team to assign devices to your account.
3. After the devices are assigned, a house will be seen on the Homepage of the Ativo Automation app > Select the house > Select the room > Four devices will appear through which you can control and check the status.
4. You can rename the devices as per your convenience.
5. From the Homepage you can add a scheduler and scene as per your requirement.

Adding Scheduler
1. Home Page > Scheduler > Select house > Add Scheduler > Enter the specifications > Save > Toggle the scheduler to make it ON.
2. You can turn the scheduler OFF or delete the scheduler accordingly.

Adding Scenes
1. Home Page > Scene > Select House > Create Scene > Enter the Specifications > Save > Toggle the scheduler to make it ON.
2. You can turn the scenes Off or delete a scene accordingly.
3. You can also press Power OFF All Devices to switch all the devices OFF at an instance.

Features of the App
- Device Control
- Alerts
- Scheduling
- Scenes

- Status Check
